**We recommend all installations of this trigger be carried out by a competent gunsmith and with weapon unloaded and pointed in a safe direction. Failure to adhere to this warning can result in serious injury and/or death!**

## Proper installation of pressure pads for AR-10 3MR Trigger Systems

In addition to the pressure pads installed during manufacturing, the 3MR ships with two (2) extra pressure pads

Due to differences in lower receiver manufacturing specifications, it may be necessary to utilize the additional pads to ensure solid fitment

If installation of additional pads is necessary, use a small amount of adhesive to secure each pad to the corresponding pad, stacking them as shown in photo
